

Press Release

With Alke' electric vehicles the pizzeria is movable

Alke' vehicles with equipment for pizza are a real itinerant pizzeria, with oven and everything you need to prepare a pizza and sell it as 'street food'.

Padua, 5th September 2014 – The Alke' electric van with equipment for pizza is a real movable pizzeria. On the cargo bed are installed an oven (gas or electric), a double bowl sink with hot or cold water, a refrigerator, a work table, refrigerated containers for ingredients, a table for cutting and serving pizza.

Alke' vehicles for pizza are 100% electric and this offers a number of advantages: the possibility of using them even indoors, access to the low emission zones without restrictions, considerable savings in terms of maintenance costs and fuel consumption.

In addition is to be considered also a significant reduction of the management costs that you have with an itinerant pizzeria compared to a conventional one.

The movable pizzeria can be placed in high-traffic areas and meet just in time customer demand, for example, cities where there are no pizzerias, various events, private parties, etc.

In addition, the "street food" that is becoming increasingly popular has reached levels of quality that have nothing to envy to the traditional restoration.

Alke' vehicles with pizza fitting can also be customized in color and graphics to make even more unique and recognizable your own business.

Alke'

Alke' is an Italian producer of professional, compact and heavy duty electric vehicles. It was established in 1992 and right from the first years it concentrated its efforts in the study and production of innovative vehicles for performance and, most of all, for the quality of their construction. Up to today Alke' vehicles are commercialised in more than 40 countries worldwide.
